

# NODE-RED SERVICE

DATE	15 NOVEMBER 2022
TEAM ID	PNT2022TMID40456
PROJECT NAME	SMART SOLUTION FOR RAILWAYS

The screenshot shows a web browser window displaying the IBM Cloud Developer Catalog page for the Node-RED service. The browser's address bar shows the URL: <https://cloud.ibm.com/developer/appservice/create-app?starterKit=59c9d5bd-4d31-3611-897a-f94eea80dc9f&defaultLanguage=undefined>. The page header includes the IBM Cloud logo, a search bar, and navigation links like 'Catalog', 'Manage', and a user profile. The main content area is titled 'Node-RED' and has two tabs: 'About' (selected) and 'Create'. The 'About' tab shows details about the service, including its author (IBM), update date (2/10/2020), and type (Starter kit). It also provides links to the source code on GitHub, helpful links like Terms and Tutorial, and an 'ASK A QUESTION' button. The 'Overview' section describes the starter kit as a pre-configured Node-RED application with a Cloudant service for configuration storage. It lists three key features: generating an application with Node-RED, deploying to Cloud Foundry or DevOps Pipeline, and connecting to provisioned services. A 'What's included?' section is also present. The bottom of the page shows a Windows taskbar with various icons and system information like temperature (29°C) and date (19-11-2022).

### Overview

This starter kit provides a pre-configured Node-RED application, including a Cloudant service to store the application flow configuration. Add services, generate and download the code, use the IBM Cloud Developer Tools CLI to run and debug locally, then deploy to Cloud Foundry or a DevOps Pipeline.

This starter kit will help you

- Generate an application with Node-RED
- Generate an application with files for deploying to Cloud Foundry or a DevOps Pipeline
- Connect to provisioned services
